Professional Summary

Full Stack Web Developer specialized in React, Next.js, and Node.js with hands-on experience in e-commerce, SaaS platforms, and mobile applications. Proven track record of optimizing load times by 2x and increasing user conversions by 25% through secure authentication and enhanced UX. Passionate about building scalable, measurable, and business-driven solutions.

Technical Skills

- Languages: JavaScript (ES6+), TypeScript, SQL
- Frontend: React, Next.js, Redux Toolkit, TailwindCSS, Responsive Design, UI/UX
- Backend: Node.js, Express, Prisma, RESTful APIs, Server-Side Rendering (SSR)
- Databases: PostgreSQL, MongoDB (SQL/NoSQL)
- Tools: Git, GitHub, VSCode, Postman, CI/CD, Agile/Scrum
- Cloud & Deploy: Vercel, Firebase, Supabase

Experience & Projects

LeanMarket (Jul 2025 – Present) – Personal e-commerce project (Next.js, TypeScript, PostgreSQL)

- Designed and implemented a scalable e-commerce platform with modular architecture, improving code reusability by 30%.
- Optimized database queries with Prisma ORM, achieving endpoints up to 2x faster than initial versions.
- Built advanced product filters that reduced search times by 40%.
- Strengthened security with NextAuth and PostgreSQL as the foundation for shopping cart and payment features.

React Native Firebase App (Jun – Jul 2024) – Mobile CRUD prototype with Firestore

- Built a cross-platform application with Expo and React Native enabling real-time CRUD operations with <200ms latency.
- Integrated cloud persistence, ensuring immediate availability across devices.
- Improved usability by exploring state management patterns and mobile UI design.

Timbring (Jul – Nov 2023) – Internship at real e-commerce delivery optimization platform

- Led the migration from Auth0 to NextAuth, cutting authentication costs by 30%.
- Increased user registration conversion rates by 25% with validated forms.
- Implemented password recovery functionality, boosting accessibility and user retention.
- Developed SEO-optimized responsive landing pages supporting thousands of monthly visits.

Gamepedia (Apr – Jul 2023) – CRUD platform for video games (React, Node.js, MongoDB)

- Built an efficient search system delivering results in <300ms for a catalog of 500+ games.
- Developed a robust backend with Node.js and MongoDB to manage complete CRUD operations.
- Deployed on Vercel with a mobile-first design and SEO optimization, ensuring accessibility across devices.

Education

- Self-taught (2023–Present): Focused on Full Stack development with React, Next.js, Node.js, PostgreSQL, and modern architectures.
- Full Stack Web Developer – Henry Bootcamp (2022–2023).
- PC Repair Technician – Instituto Tecnológico Laboral, Mendoza (2015).
- Electrician Technician with Electronics orientation – Escuela Técnica N°4-111 Ing. Pablo Nogués, Mendoza (2012).

Languages

- Spanish: Native
- English: Advanced (reading, writing, speaking)
